DREER'S MID-SUMMER LIST.

July—1894—August

In submitting our Mid-Summer Price List we desire to call your attention to our reduced prices on pot-grown Strawberry plants, which are this year offered at considerably lower prices than heretofore. We offer a fine selection of the newest tested and most desirable varieties, all in strong, healthy, well-grown plants that are certain to give the best results.

INTERIOR OF ONE OF THE PACKING HOUSES IN THE PLANT DEPARTMENT OF OUR RIVERTON NURSERY.

LOW EXPRESS RATES ON PLANTS.

We are shipping by all express lines to any part of the country, plants packed in closed boxes at a reduction of 20 per cent. from regular rates of merchandise. Boxes weighing less than 100 pounds are charged at pound rates, minimum charge not less than 35 cents. For example: where the general rate is \$5.00 per 100 pounds, a box weighing 20 pounds will be carried for 80 cents. Prepaid 4 pound packages of seeds, plants and bulbs are carried to California and all distant points for 30 cents each.

HENRY A. DREER,

Seed Store and Office, 714 Chestnut Street,

Greenhouses and Nurseries, Riverton, N. J.

PHILADELPHIA, PA.

Strawberry Plants.

Our facilities for growing Strawberry Plants at our Nursery and Trial Farm at Riverton enables us to test all recently introduced and promising new varieties with the view of offering only such as show decided merit.

Pot-Grown Strawberries.

Plants set out this summer will produce a crop of fruit in June, 1895.

Pot-Grown Strawberry Plant.

Our pot-grown Strawberry plants are ready for shipment about the middle of July, and can be supplied as late as October in such varieties as are unsold at that time.

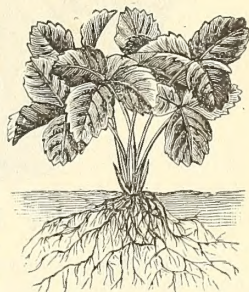

It is better, however, to procure the plants in August or September, as earlier plantings will develop larger and more vigorous plants and produce a greater crop of fruit next year, besides we are usually sold out of many varieties later in the season.

Potted plants may appear expensive, yet when the labor necessary to grow them into proper condition and the time saved in the result of the crop are considered, they will be found much cheaper than ordinary layer plants. They may be planted after a crop of early summer vegetables has been harvested, and a crop of fruit secured in eight or ten months after planting.

The reduced prices of our pot-grown Strawberry plants, this year, should enable planters to grow more largely of this delicious fruit.

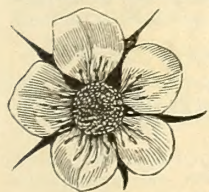

Directions for Garden Culture.

To cultivate the Strawberry for family use, we recommend planting in beds four feet wide, with an alley two feet wide between each bed. These beds will accommodate three rows of plants, which may stand fifteen inches apart each way, and the outside row nine inches from the alley. The beds can be kept clean easier and the fruit gathered without setting the feet upon them. The ground should be well prepared by trenching or plowing at least ten or twelve inches deep, and be enriched with well-rotten manure, ground bone, wood ashes, or any good fertilizer. In setting out POT-GROWN PLANTS, press the soil firmly about the plants and scarcely any will fail to grow. If the weather is hot and dry, wet the soil thoroughly and mulch with some coarse material until the plants are established; keep well cultivated and free from weeds. When the plants begin to throw out runners, they should be cut off, to establish strong plants. When the ground freezes in the early winter, a slight covering of leaves or litter, or the branches of evergreen should be applied. This covering should not be placed over the plants until after the ground is frozen; fatal errors are often made by putting on *too much* and too early. The covering should be removed in the spring as soon as the plants begin to grow. Before the fruit begins to ripen mulch the plants with short hay, straw, tan-bark or other material that will keep the fruit clean, prevent weeds and keep the ground from baking and drying, thus prolonging the fruiting season.

Right way of Planting.

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens, and are termed pistillate or imperfect flowering varieties, and must be planted near some perfect flowering sort, or they will produce little or no fruit.

Perfect Flower.

Imperfect Flower.

Plants arrived in fine shape and are very satisfactory, indeed. It is a pleasure to order and get your stock. It is always nice and done up in best of shape.—WM. REED, Chambersburg, Pa., February 17, '94

The box of plants arrived here yesterday in perfect order and condition, owing, we suppose, to its packing—the best we have ever seen.—VIONNET & CO., Havana, Cuba, February 9, '94.

Pot-Grown Strawberry Plants.

SELECT, NEW AND TESTED VARIETIES.

New Late Strawberry.—THE TIMBRELL.

This is probably the most desirable addition to our List of Strawberries for several years past, and is ranked by the Rural New Yorker, from trials made on its experimental grounds last season, as the most valuable of all the new varieties. Berries are large to very large, dark crimson and very firm. Many of the leading fruit growers of the country are looking to the Timbrell as the one very late market berry.

We have a good supply of strong healthy plants of this variety, and offer it at \$1.00 per doz.; \$8.00 per 100.

New Strawberry.—THE MARSHALL.

We give the originator's description of this variety :—Three thousand baskets of berries picked on one-third of an acre last year. The berries are of very large size, fourteen filling a basket. Color, very dark crimson throughout; fine flavor and fine grain, and a good keeper, which commends it for garden or market purposes; plants very vigorous; stands 20 to 22 inches high; blossoms perfect; foliage sufficient to protect blossoms from the frost.

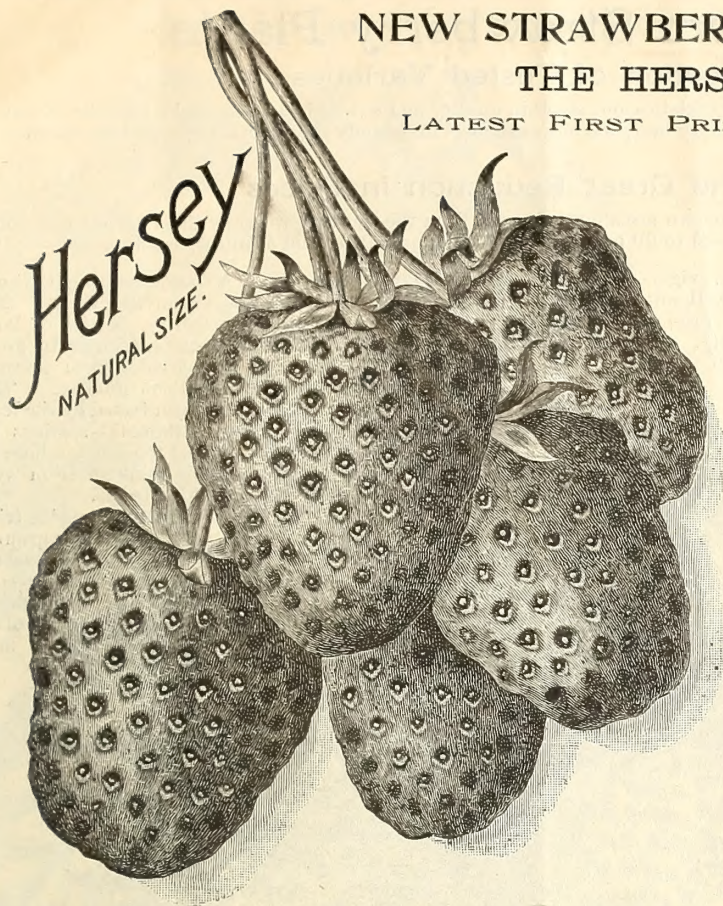

We recommend it for a trial, and offer a limited stock of plants at \$1.50 per dozen; \$10.00 per 100.

New Strawberry.—CLARKE'S SEEDLING.

This is another grand variety that originated in the Willamette Valley, Oregon, five years since, where it is now grown almost exclusively. Its superior qualities are uniform, round shape, rich red color inside and out, its remarkably fine flavor and great prolificness, under ordinary field culture, producing 200 twenty-four quart cases to the acre. It is a perfect flowered variety ripening very early. We can recommend this most highly for a trial, believing that it will give full satisfaction. 50 cents per dozen; \$4.00 per 100.

NEW STRAWBERRIES.—Continued. THE HERSEY.

LATEST FIRST PRIZE VARIETY.

This Strawberry originated at Hingham, Mass., some five years ago, it being a seedling, grown by Mr. Samuel Hersey, of that town. It attracted so much local attention that its originator soon learned that it had unusual value as a new and distinct variety; and, after securing several first prizes at local exhibitions, it was also awarded first prize at the Strawberry Exhibition of the Massachusetts Horticultural Society last season.

This berry possesses all the good qualities desired for home use and the market. Its flower is perfect, requiring no other variety to fertilize it. The fruit is of most excellent flavor, having the taste and aroma of the best varieties of the wild Strawberry. Its form is very attractive, and its color a rich, dark red; very uniform in size and easy to hull. The vines are very strong and thrifty in appearance, also extremely hardy and very productive. Under ordinary culture, 1,000 quarts of fruit have been grown on a plot of land sixty feet square—this being at the rate of over 12,000 qts. per acre.

\$1.50 per doz.; \$10.00 per 100.

New Early Strawberry.—VAN DEMAN.

An extra early perfect flowering variety, a seedling of Crescent, crossed with Captain Jack. After having been tested at twenty-seven State experiment stations, the following report from New York State is a sample of many favorable reports:

"This is the best extra early variety ever tested on the Station grounds. The first picking of three quarts of any one variety was picked from this, and it continued in bearing for twenty-one days, ripening the bulk of its fruit, however, in ten days. The vigor of the plants is good, growth stocky, and fruit hid beneath the dark foliage; berries a showy glossy scarlet, with yellow seeds, firm and tart. I am of the opinion that this variety has a great future." 75 cents per dozen; \$5.00 per 100.

New Strawberry.—THE BANQUET.

In this New Strawberry we have an exceptionally high flavored berry. It is not an untested variety, but has been under cultivation since 1880, when it first originated, in Orange County, N. Y. It is a seedling of berries crossed with the wild strawberry of the fields, the exquisite flavor of the wild fruit is so marked in "The Banquet" as to at once place it at the head of the list of high flavored Strawberries.

The berries are of medium size, measuring about one-and-a-half inches in diameter, of uniform conical shape, ripening up well without green ends, of a rich crimson color; in season it is about medium.

\$1.00 per dozen; \$8.00 per 100.

OUR NOVELTY COLLECTIONS.

For the benefit of our customers who wish to try the six new varieties here listed, in an experimental way, we have made up the following collections:

We will furnish one each of the 6 new varieties, or 6 plants, for 75 cents.

"	three	"	6	"	"	18	"	\$1.50
"	six	"	6	"	"	36	"	\$2.50
"	fifteen	"	6	"	"	90	"	\$5.00

The plants ordered from your firm arrived in perfect condition and were most satisfactory—more than meeting our expectations. The seeds were also satisfactory. MRS. F. LEWIS CLARK, Spokane, Washington, April 10, '94.

Pot-Grown Strawberry Plants.

A Selection of Tested Varieties.

While we do not offer a long list of varieties, our stock in quality and extent is unsurpassed. Our list of tested varieties includes only the cream of the very best, and our customers may safely rely in making selections therefrom, that they will not be disappointed.

Note the Great Reduction in Prices

in the most popular standard sorts, this we are able to do only from the fact that we grow these varieties in great quantity, and we are this season prepared to fill orders for unlimited quantities and of unsurpassed quality.

Bubach (P). Very strong, healthy, vigorous plant, that appears to thrive well on almost every variety of soil. Very productive of large berries, that ripen early. 50 cents per doz.; \$3.50 per 100; \$30.00 per 1000.

Cumberland. An excellent late variety, with large, light-red berries of regular uniform size and of delicious flavor. 50 cents per doz.; \$3.50 per 100; \$30.00 per 1000

Charles Downing.

For beauty, size, quality and productiveness this variety is unsurpassed; the flavor is very fine and

Greenville (P). A chance seedling that originated in 1883 at Greenville, Ohio. The plants are very thrifty, berries of large size, very productive, regular in form, of a rich bright color, firm texture, and of excellent quality. This berry has been tested by the leading experimental stations for the past ten years, whose reports speak of it in very high terms.

After extensive trials on our own grounds the past season we can recommend this as one of the most

the plants succeed in almost any soil or location; it is one of the very best for home use. 50 cts. per doz.; \$3.00 per 100; \$25 per 1000.

Eureka (P). This variety is of Ohio origin; it is of an extremely strong, vigorous, healthy growth; producing very large, bright glossy scarlet berries, somewhat corrugated like Miner; they are moderately firm, and of very good quality, season medium. 50 cts. per doz.; \$3.00 per 100; 25.00 per 1000.

Haverland (P). A lusty grower, of the crescent type; fruit and leaf stalks long, like Ohio and Kentucky; pistillate or imperfect blossom; ripens early. Enormously productive of medium to large, long conical berries, of pale scarlet color; very uniform in size and shape; rather insipid in flavor, but so extremely early, prolific, and showy, that for medium and light soils it is one of the most profitable. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

desirable sorts. 50

cts. per doz.;

\$3.00 per 100;

\$25.00 per 1000.

Gandy's Prize.

A strong, healthy plant, that makes but few runners, so that there is never any crowding of plants. Perfect blossom; moderately productive, of large, perfectly formed berries, which are held well up from the ground; ripens very late, and on this account is one of the most valuable, as it brings the highest price when put on the market, owing to its size, beauty and firmness.

60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.

EUREKA.

Jucunda Improved. Old Strawberry cultivators do not need to be told that the Jucunda was one of the most beautiful and delicious of strawberries, and that it would only succeed in a few exceptional places. Jucunda Improved appears to possess all the good qualities of the original, while it succeeds on almost any good soil. For family use or fancy market it will pay to plant Jucunda Improved.

75 cts. per doz.; \$5.00 per 100.

Pot-Grown Strawberries—Continued.

PARKER EARLE.

Parker Earle. A most wonderful producer, having yielded at the rate of 15,000 quarts per acre. Thorough trials prove its adaptability to all climates, out-yielding all others in the south or north, producing prodigiously in either wet or dry seasons. Stems strong and upright; as many as twelve to a plant, each carrying from 20 to 30 berries. This magnificent new berry produces wonderful crops on light soils, and endures hot, dry weather better than most strawberries. Perfect flowers; berries large, conical, regular and uniform, glossy crimson, flesh firm, reddish and in quality excellent. Early to late. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

Jessie. A seedling from the Sharpless; perfect blossom; fruit large to very large; dark scarlet color; firm and solid and of excellent quality; only moderately productive. 60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.

Kentucky. An old and well tried variety; of fair size and good flavor. A regular bearer; desirable for home use or near market. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

May King. A healthy plant; free runner, and moderately productive of bright scarlet berries; perfect form and fine quality, and one of the earliest to ripen. 60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.

Middlefield (P). The berries are large, quite regular in size, and form nearly conical; firm and solid, making it a good shipper; color, a dark glossy crimson, giving it a brilliancy that but few varieties possess. It colors up all over, and the flesh is crimson clear through. It is of superior quality. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

Michel's Early. A very strong growing, extra early variety; ripening several days before Crescent Seedling; moderately productive; quality good; very attractive in color. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

Miner. A reliable standard sort for family use or for market; plant healthy and vigorous, productive of medium to large berries, somewhat resembling the Downing, only darker in color. 60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.

Sharpless. A grand old favorite and undoubtedly the best berry for general purposes in cultivation, adapting itself

to almost all conditions. Berry very large, clear red; firm, sweet, and of good quality. 50 cts. per doz.; \$3.00 per 100; \$25.00 per 1000.

Yale. A strong vigorous grower and heavy bearer, berries of large size, good shape; color deep dark red, juicy, yet solid, with no hollow centre. Ripens late. 60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.

CELERY PLANTS.

Celery plants can be supplied from June 15th to August 25th. We grow the following varieties, which we offer at the uniform price of 40 cents per 100; \$3.50 per 1000 (by mail, 55 cents per 100.) Special prices on 5000 or more.

Celery requires a moist, rich soil, and will not thrive in poor soil and dry situations. After the plants have attained a height of 5 or 6 inches they should be set out in rows three feet apart and six inches in the row. When twelve to fifteen inches high, the soil should be loosened by the use of the plow or hoe and the plants be "handled." This operation consists of drawing the stems upright with one hand, and pressing the soil firmly against the plant with the other; by this process the plants grow upright and can be easily cultivated and blanched by drawing the soil close up to the plant. Celery should receive thorough cultivation if good results are desired. To store for winter use, select well drained ground, dig trenches 1 foot wide and deep enough to cover the tops of the plants. Pack the stalks in this in an upright position, covering with boards to shed the water, and in severe weather protect with straw or leaves.

White Plume. This is a very ornamental variety, while its qualities are equal to the best, being crisp, solid, and having that nutty flavor peculiar to some of the red kinds.

Golden Self-Blanching. An early beautiful and in every way desirable sort, requiring but little labor to blanch. The heart is a rich golden yellow, with light yellowish green outer leaves. Of dwarf, compact habit, rich nutty flavor and an excellent sort for table decoration.

Giant Pascal. A superior keeping sort. The stalks are very large, thick, solid, crisp, and of a rich nutty flavor, free from any trace of bitterness; it blanches very easily and quickly, and retains its freshness a long time after being marketed. The heart is golden yellow, very full and attractive in appearance.

Perfection Heartwell. A large solid growing variety of excellent flavor and creamy white color. In size it is between the Golden Dwarf and White Solid. It is an excellent market sort, as the stalks are clear and attractive in color.

40 cents per 100; \$3.50 per 1000.

New Rose. In this variety we have a combination of the best qualities of Celery. The red sorts surpass the white in flavor, and possess in their coloring a valuable feature as a table ornament.

Early Arlington. An improvement on the Boston Market, being earlier and of larger growth and blanches rapidly.

Boston Market. An excellent half dwarf sort of vigorous and bushy habit, producing many side shoots. Blanches perfectly white, is very sweet, crisp and of excellent flavor.

Dreer's Large White Solid. The best of the large growing sorts. Stalks firm, white and sweet, will not become pithy if grown on moist soil.

Golden Dwarf. A standard variety of great merit. In size it is the same as the half dwarf kinds; the heart is large, full and of a fine golden yellow color.

Henderson's Dwarf White. This variety is perfectly solid, the stalks half round. When blanched it is a yellowish white, crisp, tender, and of a fine nutty flavor.

Special prices on 5000 or more.

CABBAGE PLANTS.

NOW READY.

Late Flat Dutch. Grown from our select late Flat Dutch seed.

Large Drumhead. A favorite variety with market gardeners.

40 cts. per 100; \$2 50 per 1000 (55 cts per 100 by mail.) Special prices on 5000 or more.

Perfection Drumhead Savoy. The largest solid heading sort among the Savoy.

Red Dutch Drumhead. The largest and best for pickling.

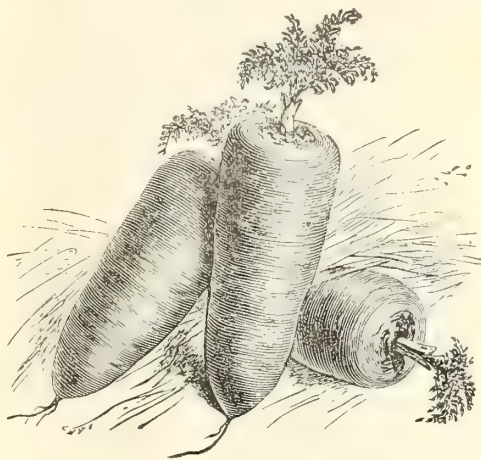

VEGETABLE SEEDS

FOR SUMMER AND FALL SOWING.

The following list of vegetable seeds comprises the leading varieties suitable for present sowing. By sowing at intervals during the summer months a constant supply of fresh vegetables may be obtained until late in fall. When beans and peas are to be sent by mail, add 15 cents per quart additional to the price for postage. We pay postage on small seeds by the packet, ounce or quarter pound.

Pkt. 5 cts. ; oz. 10 cts. ; ¼ lb. 20 cts. ; lb. 50 cts.

MISCELLANEOUS.

Golden or German Millet. Grows much taller than the Hungarian Grass, and produces larger crops ; it also requires more time to grow, and a good soil. It makes a very coarse-looking, dry fodder, which is readily eaten by live stock. (50 pounds to the bushel.) Price variable. Per bushel, \$1.20.

Hungarian Grass. (*Panicum Germanicum*). An annual forage-plant of great value. It flourishes during the heat of summer, remaining green when almost all other vegetation is dried up. It is one of the very best plants for green fodder, or for ensilaging, and makes hay of the best quality. Sow broadcast about one bushel of seed per acre, at any time from the middle of June till the first of August. (48 pounds to the bushel.) Price variable. Per bushel, \$1.50.

Japanese Buckwheat. This superior variety is earlier and more prolific and yields double the weight per acre of other sorts, while it yields a flour of equal quality. Peck 40 cts. ; bu. (48 lbs.) \$1.20.

Crimson or Scarlet Clover. (*Trifolium incarnatum*). This is an annual variety, in common use in the South and Middle States for feeding green and for hay, also as a green manure for plowing in. It can be seeded at any time from June to October at the rate of 10 to 15 lbs. per acre and makes the earliest possible spring pasture, blooming the latter part of April or May, and for feeding as hay should be cut when in full bloom. If sown with Italian Rye Grass, which matures at the same time, it yields luxuriant and nutritious crops. Per pound, 15 cents. Per bushel (60 lbs.) \$6.50.

Italian Rye Grass. This is earlier and quicker in growth than the Perennial Rye Grass, producing larger and more succulent leaves, but is not as durable. Sown with Crimson Clover in fall, it matures with it the following spring, making an excellent pasture or hay. Sow fifty pounds to the acre, or 25 lbs. with 5 to 8 lbs. of the clover. Per pound, 15 cts. ; per bushel (20 lbs.) \$2.25.

Flower Seeds.

The following list of Flower Seeds comprises a choice collection of Perennials that should be sown in the summer and fall for blooming next year. The *Calceolaria*, *Cineraria*, *Primula*, etc., for indoor blooming in the winter and spring, and the hardy varieties for blooming outdoors during the spring and summer months. Our selections of the seeds here offered are from world-renowned sources and have always given the highest satisfaction.

Aconitum Napellus.

(MONK'S HOOD, OR WOLFSBANE.)

5017. A hardy perennial, growing in any good garden soil, with very pretty blue and white flowers; 3 feet. 5

Alyssum.

(SAXATILE COMPACTUM.)

5084. Showy golden-yellow flowers; hardy perennial; 1 foot 5

Aquilegia.—Columbine.

Beautiful hardy perennial, blooming freely early in the spring and summer.

- 5143 **Chrysantha.** (*Golden-Spurred.*) Bright golden-yellow flowers; 3 feet. 5
 5144 **Cœrulea.** Violet-blue; inner petals pure white; 2 feet. 10
 5151 **Glandulosa.** Inner petals pure white; outer a lovely shade of light blue; 2 feet. 10
 5152 **Skinneri.** Bright scarlet and yellow; 1½ feet. 10
 5160 **Single,** all colors mixed; 2 feet. 5
 5150 **Double,** " " 18 inches. 5

Ampelopsis Veitchi.

5101. The popular Boston Ivy, one of our most valuable climbing plants. Per oz., 25 cts. 5

Antirrhinum.

(SNAP-DRAGON.)

The improved varieties of this valuable genus are large, finely-shaped flowers of the most brilliant colors. Hardy perennial; 1 foot.

- 5140 **Tom Thumb, Mixed.** finest dwarf. Per oz., 50 cents. 5

Auricula.

5240. A well-known favorite of great beauty; seed saved from splendid choice varieties; half hardy perennial, mixed; 6 inches. 25

Abutilon.

5010. Greenhouse shrubs of strong growth and easy cultivation, free-flowering, with various-colored, beautiful drooping bell-shaped flowers; fine mixed. 25

Acacia.

5013. Elegant greenhouse shrubs, having fine ornamental foliage, and beautiful racemes of various shades of yellow globular flowers. Soak the seed in warm water before sowing. Fine varieties, mixed; 6 to 10 feet. 10

Campanula.

(BELL-FLOWER.)

Well-known beautiful hardy herbaceous perennials.

- 5420 **Media, Single Mixed**—(*Canterbury Bells*). Beautiful large bell-shaped flowers; hardy biennials; 2½ feet. 5
 5410 **Media, Double Mixed;** 2½ feet. 5
 5363 **Media Calycanthema** (*Cup & Saucer*). This is the finest variety of *Campanula*, producing plants with white and blue flowers resembling cup and saucer; mixed. 10

CALCEOLARIA HYBRIDA GRANDIFLORA.

Calceolaria.

Gorgeous plants, producing a mass of beautiful pocket-like flowers early in the spring, a universal favorite for the green-house or conservatory. Sow end of July or in August. Per pkt.

- 5350 **Calceolaria Hybrida Grandiflora, Mixed.** Large flowering, beautiful, rich, self-colored flowers; saved from a choice collection; 20 inches. 25
 5352 — **Hybrida Trigrina, Mixed.** Large-flowering, tigered and spotted flowers; the very finest mixture of the most brilliant colors; 20 inches. 35
 5353 — **Hybrida Pumila Compacta.** Of dwarf, compact, robust growth, producing immense trusses of large and varied brilliant self-colored and spotted flowers; 1 foot 35

Carnation.

Carnations and Picotee Pinks are general favorites for their delicious fragrance and richness of color. The seeds we offer have been imported from the best sources in Europe, and will produce many splendid novelties in double and semi-double flowers; protect during the winter; half-hardy perennials; 1½ feet. Per pkt.

- 5425 **Carnation, Finest German.** Mixed colors; saved from extra fine double-named flowers. 20
 5426 — **Remontant, or Tree.** (*Double Perpetual*). Mixed colors; saved only from the finest and choicest double-named flowers 35
 5430 — **Fine Double Mixed.** The hardiest and best varieties for garden culture. 10
 5423 — **Early Flowering Double Vienna.** 10
 5428 **Carnation, Marguerite.**—One of the very best of recent introduction. Flowers in four months from seed and blooms continuously in great variety of colors, and delightfully fragrant. Most desirable for cutting. ¼ oz., \$1.00. 10

Hardy Perennial Candytufts.

- 5388 **Iberis Sempervirens.** A profuse white blooming hardy perennial, adapted for rockeries, baskets, etc., coming in flower early in spring; 1 foot..... 10
- 5379 **Iberis Gibraltaria Hybrid.** Very fine species with white flowers shading off to lilac. 1 foot 10

CINERARIA HYBRIDA GRANDIFLORA

Cineraria.**"Dreer's Prize Strain."**

This strain of Cineraria cannot be surpassed either for size of flower or beauty of color. We have received very flattering reports from florists and private gardeners of their success with our Cineraria seed. All desiring the *best* should procure our Prize strain. Sow in July and August.

- | | | |

DREER'S ROYAL EXHIBITION PANSY.

PANSIES.

This attractive plant is too well known to require any description, as it is a favorite with all. Sow in July and August, and plant some out in Fall and others in frames for early blooming. The best plants are obtained from seed sown in the autumn, and protected during winter; these flower early in the spring.

- | | | |
|------|---|----|
| 6238 | Dreer's Royal Exhibition. This strain comprises a beautiful collection of colors and markings, and we are confident it will prove satisfactory for perfection of form, firmness of texture, freedom of bloom and elegance of coloring. It is the result of many years' careful selection and hybridization, and embraces all the attractive features that tend to make the Pansy the people's flower. ½ oz., \$1.00..... | 50 |
| 6220 | Dreer's Premium. Seed saved from first-class flowers only; beautiful colors mixed. ½ oz., 75 cts..... | 25 |
| 6222 | Odier (Five-blotched). A beautiful strain of various colored large, handsome perfectly-formed flowers. ½ oz., \$1.00..... | 25 |
| 6217 | French Large Stained. Very beautifully marked varieties in finest mixture, from a celebrated French grower | 25 |
| 6216 | Bugnot's Superb Blotched. A beautiful new class with extra large flowers in great diversity of colors. | 50 |
| 6219 | Giant Prize Trimardeau. Large flowering varieties in finest mixture..... | 15 |
| 6230 | English Finest Mixed. Per oz., \$3.00 | 10 |
| 6240 | Good Mixed. All colors. Per oz., \$1.50 | 5 |

We have now in flower the largest Pansies we ever saw from your Royal Exhibition Strain.—H. NIESSNER Johnstown, Pa., April 24, '94.

I took first prize for Pansies grown from your seed last fall, in competition here.—G. H. HASZARD, Charlotte-own, Canada, March 6, '94.

CHINESE PRIMULA.

Primula Sinensis Fimbriata. (FRINGED CHINESE PRIMROSE.)

These charming and beautiful plants are indispensable for winter and spring decoration in the greenhouse or conservatory. Our seed is as usual from the finest collections in Europe.

6727 Single Mixed. Blue and white.....	10

WALLFLOWER.

Well-known deliciously fragrant garden plants, blooming early in the spring, with large conspicuous spikes of beautiful flowers; they should be protected in a cold frame in the winter, and planted out in May; are much prized for bouquet flowers; half-hardy perennials.

6740 Wallflower Single Mixed.....	5
6730 — Finest Double Mixed.....	10
6739 Collection of Double Wallflower; 12 varieties.....	\$1.00

I have been growing plants, both for private and commercial use, for the past thirty-five years, and I have never seen a better strain of Primulas and Petunias, either in this country or in Europe, than yours. They are superb.—JAMES KIRBY, Manchester, N. H., Jan. 29, '94.

Seasonable Plants.

An abridged list of the leading varieties suitable for summer planting and the decoration of the conservatory, greenhouse, verandah or lawn. For a complete list, see Dreer's Garden Calendar.

ALLAMANDA WILLIAMSONII.

NEW DWARF ALLAMANDA.

This handsome variety is entirely distinct from all others, being quite dwarf and in no way resembling a climber, but forming a compact bush with trusses of bloom at every point, and having from two to four expanded blooms on each extremity at the same time, and buds innumerable. It continues flowering the whole summer, and, with proper management, in the winter also. The flowers are from $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter, of a very rich yet delicate tint of yellow, and are deliciously scented. Good young plants 75 cts. each.

Alocasia Macrorrhiza Variegata.

A strictly handsome ornamental leaved plant, foliage nearly as large as Caladium Esculentum, light green, broadly splashed with white. Its easy growth, combined with rich variegation, makes this one of the most valuable decorative plants. 50 cts. to \$1.00 each.

Ardisia Crenulata.

A very ornamental greenhouse plant, with dark evergreen foliage, producing clusters of brilliant red berries; a first-class house plant in winter.

75 cts. each.

Aralia Veitchii Gracillima.

A splendid decorative plant with finely divided foliage, which is of a glossy green above and dark red beneath; it is of an elegantly graceful habit, and unsurpassed as a plant for table decoration. \$1.00 to \$1.50 each.

Aralia Sieboldii Variegata.

A large leaved variety with beautiful green and white variegated foliage, succeeding admirably as a house plant. 75 cents each.

ARDISIA CRENULATA.

I want to tell you how delighted I am with the plants you sent me last week. The Palms are perfectly beautiful and so very uniform in size; the foliage clean, and the packing excellent.—MRS. C. A. HENRY, Fostoria, O., Feb. 25, '94.

AQUATICS.

(WATER LILIES, Etc.)

The following varieties of tender *Nymphaeas* can be supplied during the entire season grown in large pots in strong flowering plants, and may be flowered successfully by submerging the pots in tubs of water in any warm sunny position.

Nymphaea.

Tender Varieties.

These can be wintered in a cellar, if kept in water at a temperature of not less than 55 degrees.

Nymphaea Dentata. A white flowering species, with petals expanding horizontally, making them star-shaped. They have an agreeable perfume, but not as strong as our native Lilly; the leaves are dark green, with serrated edges. First size, \$2.50 each; second size, \$1.50 each.

Nymphaea Cœrulea, (Scutifolia.) This species is a native of Egypt. It has bright green leaves and lavender blue flowers, about 4 inches in diameter; they are very fragrant, the perfume being entirely distinct from *N. Odorata*. It is very easily cultivated in a tub or tank, or it may be planted in a pond where the water is still and warm and the mud is rich. \$2.50 each.

Nymphaea Devoniensis. This is the choicest Water Lily in cultivation. Under liberal treatment it produces flowers 10 to 12 inches in diameter, and leaves 2 feet across, the plant having a spread of 20 feet. If confined in pans, tubs or boxes, the flowers are smaller, but otherwise just as fine; the color is a brilliant red, glowing by lamp-light with indescribable brightness. \$2.50 each.

Nymphaea Rubra. This species is a native of India, with flowers of a brilliant rosy red, stamens scarlet. The flowers are somewhat smaller than *N. Devoniensis*, measure from 6 to 8 inches, and are a trifle more cup-shaped. The leaves are of a rich brown, and when they fade, turn to a gold and crimson color, like autumn leaves. First size, \$2.50 each; second size, \$1.50 each.

Nymphaea Zanzibariensis Azurea. The deepest colored and finest of all the blue Water Lilies; under good cultivation producing flowers 12 inches in diameter. \$2.50 each.

Pontederia Crassipes Major.

(WATER HYACINTH.)

A very showy aquatic, bearing very freely flowers of a delicate lilac rose in trusses like a Hyacinth. The individual blooms are 2 inches in diameter. It should be grown in about 3 inches of water, so that the ends of the roots can enter the soil. 35 cts. each.

THE WATER HYACINTH.

Anthurium Scherzerianum.

One of the most striking and dwarf-flowering stove plants, producing beautiful brilliant scarlet flowers, each of which remains from two to three months in bloom. \$1.00 each.

Asparagus Plumosus Nanus.

The stems of this extremely elegant plant are tufted, slender, and gracefully arched. From the upper portions the branches, which are finer than the fronds of the most delicate Fern, spread in all directions. The whole plant is of a bright cheerful green. It is one of the most distinct and effective decorative plants. 25 to 50 cts. each.

Aspidistra Lurida.

A very useful and durable decorative plant of strong growth; will succeed in any position; an excellent hall or corridor plant. 50 cts. to \$1.00 each.

Araucaria Excelsa.

(*Norfolk Island Pine.*)

Beautiful specimens of this popular Evergreen, one of the most useful and attractive decorative plants, 15 inches high, \$2.00 each; 18 inches, \$3.00; 24 inches, \$5.00; 36 inches, \$7.50.

Araucaria Excelsa Glauca.

This is identical with the above, except in the color of the foliage, which is of a beautiful bluish or glaucous color. The plants we offer of this are exceptionally heavy fine dwarf specimens. 15 inches high, \$3.50 each; 24 inches high, \$5.00 each; 30 inches high, \$7.50.

ASPIDISTRA LURIDA.

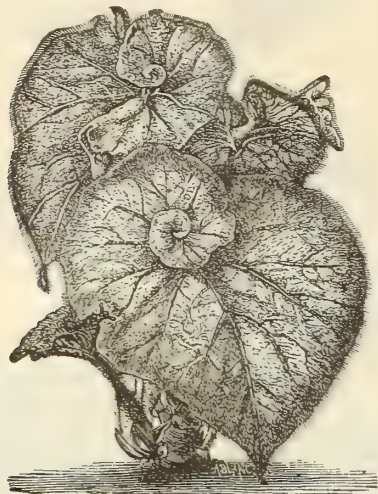

Begonia Rex.

We have a most beautiful collection of this justly popular pot plant in twelve very handsome varieties. 25 cts. each; \$2.50 per doz.

Begonia Thurstonii.

A distinct and pretty shrubby variety with thick heavy foliage, which is of a rich metallic green above and bright red underneath; the flowers are of a fine pink, rising well above the foliage.

As a bedding plant for a partially shaded position this variety is unequalled. 15 cents each; \$1.50 per dozen.

Begonia Countess Louise Erdody.

The leaf, which has a metallic lustre, appears dark silvery in the centre, shading into coppery rose toward the margin, which is broadly and evenly edged with the same hue, but darker and more brilliant. The striking peculiarity, however, which distinguishes it from all other Begonias, is that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full-grown leaf there are four of these twists lying on the top of the leaf nearly two inches high. 25 cents each.

Fancy Leaved Caladiums.

For many years the Fancy Leaved Caladiums have been a special feature of our establishment. We grow several large houses of these beautiful plants alone. Our collection has been carefully revised and contains only first-class, distinct and well marked varieties, and is acknowledged to be the finest in the country. Their greatest value is for the decoration of conservatories, green-houses and window boxes, while nothing can surpass them as exhibition plants for fairs during the summer and fall. From our collection we are able to supply 60 distinct and fine varieties. 25 cts. each; \$2.50 per doz.

Cestrum Parqui.

(Night Blooming Jasmine.)

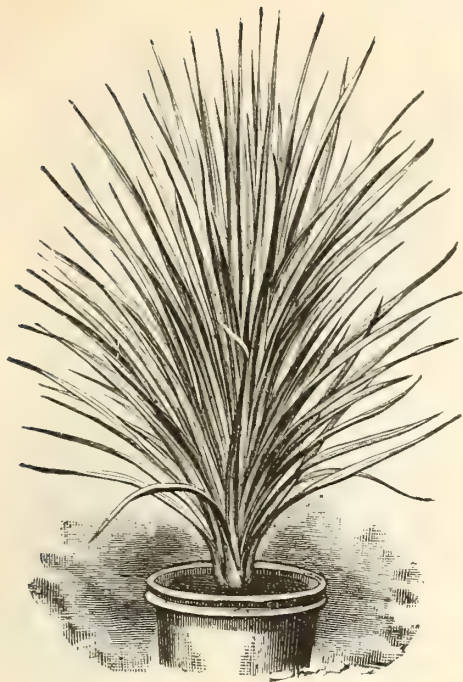

A beautiful tender shrub of easy cultivation, with small greenish white flowers, of delightful fragrance which is dispensed during the night only. 15 cents each; \$1.50 per dozen.

Cycas Revoluta.

(Sago Palm.)

These are magnificent plants of noble and majestic habit, and most impressive. They are probably the most valuable decorative plants grown both for lawn and house decoration; their heavy glossy deep green fronds resist alike the gas, dust and cold to which decorative plants are frequently exposed. We grow an immense stock of them, and can supply fine specimens at \$5.00, \$10.00, \$15.00, \$25.00 and \$35.00 each. Small plants 50 cts. to \$1.00 each.

DRACÆNA INDIVISA (CORDYLINA).

Dracænas.

Amabilis. Green, white and pale violet; strong plants. 50 cts. each.

Ferrea. Dark crimson foliage. 30 to 50 cts. each.

Terminalis. Rich crimson foliage, marked with pink and white. 30 cts. to 50 cts. each.

Youngi. Light green, changing to copper color. 50 cts. each.

Dracæna Fragens.

A superb African species, with beautiful deep green leaves, lighter in the young growth. Though having no variegations or markings in the foliage, this is one of the most admired of the decorative species, its elegant habit and extremely beautiful lively coloring giving it marked value. It is a rapid grower, and for room adornment or as a vase plant for out-of-door use is indispensable. 50 cts. to \$1.00 each.

Dracæna Lindenii.

A beautiful variegated form of Fragens, with broad green foliage and golden yellow stripes on the edges of the leaves. 50 cts. to \$1.50 each.

Dracæna Massangeana.

Another variegated form of the above with the variegation through the centre of the leaf instead of on the edges. 50 cts. to \$1.50 each.

Dracæna (Cordylina).

The Cordylines are especially well adapted for centres of vases, baskets, etc.; the bright green narrow foliage contrasting well with other foliage and flowering plants.

Australis. Very long, narrow, graceful foliage.

Indivisa. Long foliage; green, graceful.

Veitchii. Long foliage, brown streaked. 25 to 50 cts. each.

Clerodendron Balfouri.

A beautiful greenhouse climber and admirably suited for house culture; flowering most profusely with bright scarlet flowers, enveloped in a creamy white calyx. 25 cts. each.

Camellia Japonica.

The varieties we offer of this desirable plant are the best of their respective colors, and consist of white, pink, mottled, rose, etc. We can supply twelve distinct sorts.

1st size,	\$2.00 each ;	\$20.00 per doz.
2d "	1.25 "	12.00 "
3d "	.75 "	9.00 "

Cissus Discolor.

A beautiful climber for hanging baskets, with mottled and marbled crimson and green foliage. 30 cts. each.

Crotons.

Of this beautiful class of ornamental foliage plants we offer twelve of the finest varieties. 30 cts. each; \$3.00 per dozen.

Eucharis Amazonica.

A splendid hot-house plant, blooming nearly the entire season. It sends up stalks bearing several pure white, star-shaped flowers, 4 inches across, delightfully fragrant. It is very highly prized in bouquets, baskets, etc. Pot in light rich soil, well drained; water freely in the growing season, giving a slight rest in fall. 30 cts. to 50 cts. each.

Gardenia Florida.

(Cape Jessamine.)

A popular well-known plant with delightfully fragrant pure white flowers, blooming from May to July. 50 cts. each.

Lapageria.

Most beautiful greenhouse climbers, bearing large pendant waxy flowers.

Lapageria Rosea. Rich rosy crimson. \$2.50 each.

FICUS ELASTICA.

FICUS ELASTICA VARIEGATA.

FICUS.

Ficus Elastica. The well-known India-Rubber Tree, one of the very best plants for table or parlor decoration; its thick leathery leaves enable it to stand excessive heat and dryness. Fine plants 50 cts., 75 cts. and \$1.00 each.

Ficus Elastica Variegata. This is one of the finest decorative ornamental foliage plants of late introduction. In habit and growth it is like the ordinary *F. elastica*, but the leaves of this novel plant have a pleasing yellow variegation throughout. Fine plants, \$1.00 each.

Ficus Repens. A trailing or creeping variety with small foliage, useful for baskets. 25 cts. each.

DAVALLIA STRICTA.

FERNS.

LASTREA ARISTATA VARIEGATA.

No collection of plants is complete without Ferns. The selection we offer embraces the best varieties of this beautiful class of plants, whose diversity and gracefulness of foliage make them peculiarly fitted to combine with other fine plants and flowers.

The popularity of Ferns has increased wonderfully in the past few years, and they are now indispensable in all choice floral decorations, and are especially valued for ferneries for room and table decoration.

Where there is moisture and shade most of the varieties succeed well when planted out of doors; they delight in a light soil mixed with sand and peat or leaf mould; good drainage must be provided, as stagnant water is fatal to success.

The varieties marked with an * are such as we grow in very large quantities in 2½ inch and 3 inch pots. They are sorts that are best adapted for planting in fern dishes for table decoration. We can supply these varieties in quantities of not less than 25 plants (2½ inch pots) at \$8.00 per 100; (3 inch pots) at \$10.00 per 100.

We will furnish the entire collection of Ferns, 66 varieties, for \$10.00.

We can also supply specimen plants grown in 10 to 12 inch pans, which make beautiful plants for decorative purposes, of nearly all the following varieties, at from \$1.00 to \$3.00 each.

Adiantums—(Maiden-Hair Ferns)

Adiantum Anitense. A strong upright growing variety, with deep green leathery foliage. 25 cts.

—**Bellum.** A beautiful variety, with tufted fronds about 4 inches long. 15 cts.

—**Concinnum.** Light green, recurving. 15 cts.

*—**Concinnum Latum.** Similar to the above, but of erect habit. 15 cts.

*—**Cuneatum.** The popular Maiden Hair Fern. 25 to 50 cts.

*—**Cuneatum Grandiceps.** A very beautiful form of A. Cuneatum, having long graceful fronds, with the ends of the fronds developed into bunching tasselled heads; a distinct and lovely variety. 25 and 50 cts. each.

*—**Decorum.** A strong growing variety, with bronzy foliage. 15 cts.

*—**Dolabriforme.**—A remarkable Fern of peculiar creeping habit, with long drooping fronds, at the ends of which young plants form; admirably adapted for growing in hanging-baskets. 25 cts.

—**Farleyense.** This is the finest of all the Maiden Hair varieties. 50 cts., \$1.00, \$2.00 each.

*—**Gracillimum.** Smallest and most graceful Maiden Hair. 25 cts.

—**Le Grandi.** Dwarf, compact, fine foliage. 15 cts.

—**Macrophyllum.** Foliage large, of a bronzy crimson color in the young state, changing to deep green; one of the best. 50 cts.

***Adiantum Pubescens.** A useful basket variety. 15 cts.

—**Pulverulentum.** 15 cts.

—**Rhodophyllum.** An elegant dwarf growing species with large bronzy foliage. 50 cts.

—**Wiegandi.** A pretty little species, with peculiarly crested and overlapping pinnae. 25 cts.

Asplenium Belangeri. An easy growing species, with pretty divided pinnae. 25 cts.

—**Biforme.** 25 cts.

—**Grande.** 25 cts.

—**Luxum Pumilum.** 25 cts.

Alsophila Australis. Australian tree-fern, a very rapid growing species. 25 cts. and 50 cts.

Blechnum Braziliense. A strong growing species, useful for decorative purposes. 25 cts.

Cibotium Glaucom. } Splendid Tree Ferns.
“ **Regale,** } 50 cts. to \$1.00. each.
“ **Schiedei,** }

Cyathea Medullaris. A very choice and rare tree-fern. 50 cts. to \$2.00.

Cyrtomium Falcatum. 15 cts.

*—**Caryotidium.** 15 cts.

—**Fortunei.** 15 cts.

Davallia Fijensis Majus. Useful for baskets. 25 cts.

***Davallia Stricta.** (See cut). One of the finest Ferns in cultivation, whether for growing as a decorative plant in the room or planting out; the fronds are of a strong texture and of a beautiful shade of green. 25 and 50 cts.

FERNS—Continued.

DAVALLIA FIJIENSIS PLUMOSA.

Davallia Fijiensis Plumosa. A charming evergreen Fern, with gracefully arching fronds, of easy and rapid growth. 25 to 50 cts. each.

Davallia Mooreana. An elegant exhibition Fern of rapid growth. 50 cts.

***Dicksonia Antarctica.** 25 cts.

Didymochloa Truncatula. 25 cts.

Doryopteris Nobilis. 50 cts.

Gymnogramma.

—**Sulphurea.** Sulphur Fern. 15 cts.

—**Schizophylla.** 15 cts.

***Lastrea Aristata Variegata.** This most beautiful variety has a broad band of yellowish green running through the pinnules; very ornamental. 25 cts.

Lastrea Multifida. A pretty species, with finely crested pinnae. 15 cts.

Lastrea Opaca. A pretty species, with dark green triangular foliage. 15 cts.

***Lomaria Ciliata.** A dwarf Tree-Fern. 15 cts.

Microlepia Cristata. A most useful decorative Fern, indispensable in any collection. 25 to 50 cts.

Nephrolepis Davalleoides Furcans. A beautiful and distinct crested variety, with numerous arching fronds 3 to 4 ft. long. 50c. to \$2.00.

Nephrolepis Duffii. A very distinct and remarkable fern, of a close tufted habit, producing numerous fronds of a peculiar character, and exceedingly ornamental. 25 cts.

Nephrolepis Exaltata. The Sword Fern. 15 to 25 cts.

Nephrodium Hertipes. 15 cts.

***Onychium Japonicum.** 15 cts.

***Polystichum Coreaceum.** 15 cts.

Polystichum Proliferum. 25 cts.

***Polypodium Aureum.** Large foliage of a distinct bluish color. 15 cts.

*—**Fraxinellifolia.** 15 cts.

***Pteris Argyrea.** One of the most useful Ferns for all purposes, large, bold foliage, with broad band of white through the centre of each frond. 15 cts.

***Cretica Albo-Lineata.** A pretty and useful variegated variety. 15 cts.

***Cretica Magnifica.** Beautiful crested fronds. 15 cts.

***Hastata.** A useful variety, with black stems and dark green fronds, fine for baskets. 15 cts.

***Leptophylla.** Silvery-green foliage. 15 cts.

—**Mayii.** 25 cts.

***Palmetta.** Bold, deep green foliage. 15 cts.

***Serrulata.** A useful basket Fern. 15 cts.

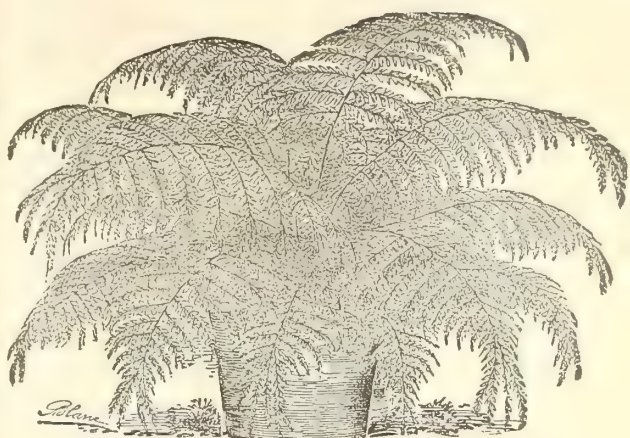

***Serrulata Cristata.** A pretty crested Fern. 15 cts.

—**Serrulata Cristata Nana Compacta.** A very dwarf variety; makes a beautiful specimen plant. 15 cts.

***Sieboldi.** 15 cts.

***Owrdardi.** 15 cts.

***Tremula.** Well known and useful Fern. 15 cts.

MICROLEPIA HIRTA CRISTATA

Pteris Tremula Smithiana. A crested form of the well-known *Pteris tremula*, with large deep green fronds, with the ends of the pinnae crested and tasseled, forming semi-pendent tufts. The whole plant presents a unique but graceful appearance, and will make one of the best large growing Ferns in cultivation, especially for exhibition purposes. 50 cts. each.

Rhyncospermum Jasminoides.

A beautiful greenhouse plant, with very glossy evergreen foliage, producing masses of pure white Jasmine-like flowers, delightfully fragrant; in bloom about May and June. It is of a climbing habit, and presents a beautiful appearance when properly trained. The flowers are very desirable for bouquets, etc. 50 cents each.

Schubertia Grandiflora.

An exceedingly pretty climber, which succeeds admirably in the open ground during the summer months, producing the entire summer, until cut down by severe frost, clusters of large funnel-shaped, fleshy-white flowers of delightful fragrance, not unlike *Stephanotis Floribunda* in appearance. 75 cents each.

Smilax.

(MYRSIPHYLLUM ASPARAGOIDES.)

A climbing plant, unsurpassed in the graceful beauty of its foliage; its peculiar wavy formation renders it one of the most valuable plants for bouquets, wreaths, festoons and decorations. Can be easily grown in the house. 15 cts. each; \$1.00 per dozen; \$5.00 per 100.

Sansevieria

Zealanica.

An elegant variegated plant, especially adapted for house decoration, the thick leathery leaves standing the heat and dust of the house with impunity. 30 cts. each; 4 for \$1.00.

SANSEVIERIA ZEALANICA.

I doubt if you ever sent out a better lot of Ferns; and I am very sure you never sent out an order that caused such genuine delight. Every single fern is beautiful and they were so perfectly packed that they were as bright and graceful when they were opened as when in your conservatory. Mrs. Mary A. Phelps, Windsor, Vt. May 26, 1894.

Maranta.

Valuable Decorative stove plants, remarkable for the richness and beauty of their varied foliage.

Makoyana. \$1.00 to \$1.50. **Massangeana.** 50 cts. **Zebrina.** 50 cts. to \$1.00.

Musa Ensete.

The leaves are magnificent, long, broad and massive; of a beautiful green, with a broad crimson midrib; the plant grows luxuriantly from 8 to 12 feet high. During the hot summer, when planted out, it grows rapidly, and attains gigantic proportions, producing a tropical effect on the lawn, terrace, or flower garden. It can be stored in a light cellar or cool greenhouse during the winter, with a covering of soil, or planted in a tub, and watered sparingly. Plants 8 in.. 50 cts. each.

Nepenthes.

(Pitcher Plants.)

We grow six choice varieties of these interesting plants. They succeed best planted in baskets suspended from the roof of the greenhouse or conservatory. They should always be thoroughly shaded and furnished with an abundant supply of water. \$2.50 to \$3.00 each.

**PANDANUS.** (Screw Pine.)

Pandanus Utilis. This is one of the most useful of our ornamental foliage plants; excellent for the centre of vases and baskets, or grown as a single specimen; for in- or out-door decoration. Fine young plants, 50 cts. to \$1.50 each.

—**Veitchii.** This is one of the most attractive plants. The leaves are light green, beautifully marked with broad stripes and bands of pure white and gracefully curved. \$1.50 to \$10.00 each.

PRIMULA OBCONICA.

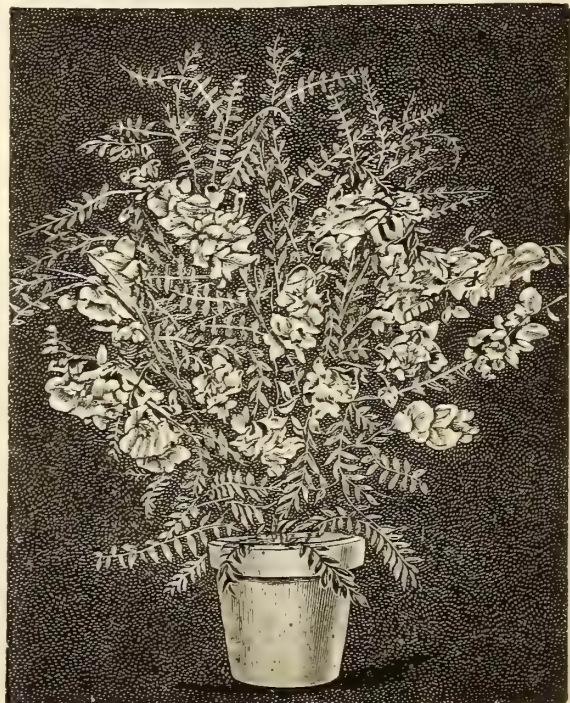

An ever-blooming Primrose, bearing on long stems heads containing 10 to 15 flowers. It thrives in a cool house and will grow in favor with those desiring plants that will grow easily. The flowers are pure white, shading occasionally to lilac, and have the true Primrose fragrance. In bloom nearly the whole season. 15 cts. each; \$1.50 per doz.

**Otaheite Orange.**

The best of the Oranges for house culture. It is of dwarf bushy habit and bears a profusion of fragrant flowers and edible fruit. We offer fine young plants that will flower and fruit freely another season at 50 cts. each.

Swainsonia Galegifolia Alba.

A most desirable everblooming plant, with pure white flowers, produced in sprays of from 12 to 20 flowers each, the individual blooms resembling a Sweet Pea. As a decorative plant for the widow or conservatory we know of nothing that will give as much satisfaction as the Swainsonia. Its easy culture, growing in almost any light position, its freedom of bloom, rarely ever being out of bloom, and the grace and beauty of the flower and entire plant, will undoubtedly make this one of the most popular plants in cultivation. 25 cts. each; 5 for \$1.00.

SWAINSONIA GALEGIFOLIA ALBA.

PALMS.

Palms are now indispensable in all decorations, whether for apartments, conservatories or for tropical bedding in summer. The large demand the past few years has induced us to considerably increase our facilities for propagating and growing this class of stock, and we have now twenty of our largest houses devoted to their cultivation alone, which enables us to supply all the leading and popular varieties at most reasonable prices.

LATANIA BORBONICA.

Areca Lutescens. One of the most valuable and beautiful Palms in cultivation; bright glossy green foliage and rich golden yellow stems. 50 cts. to \$25.00.

— **Verschaffelti.** One of the most elegant varieties, with dark shining green foliage and light colored band through the centre of each leaf. \$1.00 to \$5.00.

Caryota Urens (*Fish Tail Palm*). An easy grown and useful sort. 50 cts.

Cocos Weddelliana. The most elegant and graceful of all the smaller Palms. Its slender erect stem is freely furnished with its gracefully arching leaves, made up of innumerable long narrow pinnae or segments of rich green color. The Cocos are admirable for fern dishes, as they are of slow growth and maintain their beauty for a long time. 50 cts. and \$1.00.

PHOENIX RECLINATA.

Kentia Belmoreana. (See cut). A beautiful strong-growing Palm, deep green crisp foliage. \$1.50 to \$10.00.

— **Fosteriana.** One of the finest of the Kentias, with graceful bright green foliage. \$1.50 to \$10.00.

— **Canterburyana.** A strong growing variety with broader pinnae than the foregoing sorts; of graceful habit. \$1.00 to \$2.50.

Latania Borbonica. (*Chinese Fan Palm*). The most desirable for general cultivation, especially adapted for centres of baskets, vases, jardinières, etc. 50 cts., \$1.00, \$2.00, \$3.00, \$5.00 and \$10.00.

Phoenix Reclinata. (See cut). Beautiful reclinate foliage. A graceful and exceedingly ornamental Palm. 50 cts., \$1.00 and \$2.50.

Phoenix Sylvestris. An attractive sort, deep green foliage. 50 cts. to \$2.00.

KENTIA BELMOREANA.

Phoenix Rupicola. This is one of the most graceful among the smaller Palms, with wide spreading arching pinnate leaves, broadly lance-shaped in outlines, with long narrow pinnae, the lower of which become gradually reduced to spines. 50 cts. to \$2.50.

Seaforthia Elegans. One of the very best for ordinary purposes, of graceful habit, and rapid, easy growth. 50 cts. to \$1.00.

Pinanga Kuhlei. A strong growing variety; foliage when first developed has a rich crimson tint which changes to a dark lustrous green. 50 cts. to \$1.50.

✍ We can frequently supply large specimens of many varieties of Palms, and shall be pleased to furnish descriptions and prices to any one requiring this class of stock.

ROSES FOR FORGING.

The following is a select list of the most popular forcing varieties. We wish to especially impress upon our patrons the importance of early planting. Many, if not most, failures are caused through late planting; a vigorous young plant set early in the summer being by far preferable to a large plant set in the fall when the roots have not sufficient time to establish themselves before the plants are expected to produce a crop of bloom.

American Beauty. An excellent rose for forcing or open air. The flowers are very double, of a deep crimson color, and very fragrant.

Bon Silene. Brilliant carmine rose; a well known favorite.

Catherine Mermet. Bright flesh color, full and beautiful; one of the most lovely of its color.

Duchess of Albany. Resembles La France in general appearance, but is larger in size, deeper in color, and of more expanded form.

Kaiserin Augusta Victoria. One of the most desirable Roses of recent introduction. The flowers, which are produced in the greatest profusion, are of large size, of a creamy white color, shading deeper towards the centre. It is a strong healthy grower, with fine foliage, and will undoubtedly become popular both as a bedding variety and for forcing under glass.

La France. Splendid satin rose, the sweetest of all roses.

Madame de Watteville. Creamy white, each petal bordered light rose like a tulip, a lovely color and shape.

Maman Cochet. Probably the finest new rose of the season; the growth is vigorous, with rich, healthy foliage and extra large flowers, which are borne on long, stout stems, very double and simply exquisite when in bud or half blown; the color is a deep rose pink, the inner side of petals silvery rose. This variety will undoubtedly become very popular.

Madame Cusin. Flowers of medium size, of a rosy purple color, base of petals and centre of flower almost white, one of the prettiest roses grown.

Mme. Caroline Testout. Another charming novelty in a strong growing Hybrid Tea. The bloom is large and double; color bright satiny pink, with rosy centre. Odorous, and quite free flowering. Petals very large and heavy, and beautifully rounded. A first-rate variety for forcing, of the La France type.

Meteor. A rich, dark velvety-crimson Hybrid Tea; a free bloomer and vigorous grower, showing no tendency to mildew. Does not run single during summer, and as a garden rose it will prove invaluable. We cannot recommend it as a good forcing variety.

Niphetos. Pure white, full, fragrant, magnolia-like petals; a general favorite.

Papa Gontier. Exceedingly free flowering; one of the finest roses either for out-of-door or for winter forcing. The blooms are large and long and of a dark carmine crimson.

Perle des Jardins. Beautiful rich yellow, of large size and perfect form.

Souvenir de Wootton. Of a bright crimson color, somewhat resembling "American Beauty," and as fragrant as La France; it is of strong erect habit and produces almost without exception one or more flowers on each shoot.

Sunset. Of large size and perfect shape; it is of a rich shade of saffron and orange.

The Bride. A lovely pure white rose of the Mermet type; it is very full and double, free-flowering and excellent either for forcing or for summer planting.

The Bridesmaid. A most desirable sport from Catherine Mermet, of a richer, darker color than its parent, and a most desirable acquisition. Will undoubtedly become one of the most popular forcing Roses.

White "La France." A sport from that grand Rose "La France," with which it is identical in every way except in color, which is of a delicate blush in the centre, growing lighter and lighter to almost a pure white at the edges. A most exquisite variety.

The Acme Hand Force Pump.

In the introduction of the Acme Pump, we have a cheap, durable and powerful Force Pump. With the exception of the Iron Base, it is made entirely of brass and is very substantial.

Wherever vermin and Insect Pests can be reached with the various solutions, the Acme will be found invaluable as an exterminator.

For use in the Orchard, Greenhouse and Garden, it answers all requirements.

The Acme is useful for washing Carriages and handy in case of fire. The discharge end of the nozzle is so shaped that it can be used for Veterinary purposes.

Price, \$4.00.

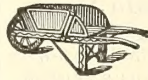

Zinc Tree Labels.

Small 60 cts. per 100; medium, \$1.50; large, \$3.00. Indelible Ink, for zinc labels. Per bottle, 25 cts. Indelible Marking Pencils, purple, 10 cts. each. Copper Wire for tree labels. Bunch 10; lb. 50 cts.

Eureka Hand Weeder.

This very handy and useful little implement is the best hand weeder yet put upon the market, and is a great improvement on the clumsy weeders made of malleable iron heretofore offered. The tines are made of the best forged steel, sharply pointed and will not break. It will do very effective work in deep cultivation of rose and carnation beds and in all other work for which a hand weeder is necessary. Price 25 cents each.

With side handle for using with pole.

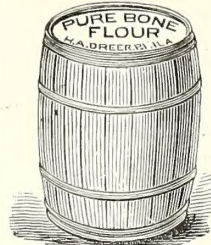

20 cts. each.

The only way to have healthy nursery stock, sound plants, and perfect fruits and vegetables is to protect them with the right fungicides and insecticides at the proper times.

Fertilizers.

Dreer's Ammoniated Bone Phosphate. A superior article, made from pure materials, and certain to give satisfactory results. 5 lbs. 20 cts.; per 100 lbs. \$2.00; sack of 200 lbs. \$3.50; per ton \$30.00.

Clay's Fertilizer. This valuable imported manure is highly recommended for all purposes in the vegetable, fruit and flower garden. Per bag of 25 lbs. \$2.00; 50 lbs. \$3.50; 100 lbs. \$6.50.

Pure Ground Bone. Excellent for restoring and quickening grass plots, gardens, etc. 5 lbs. 25 cts.; 25 lbs. \$1.00; 100 lbs. \$2.25; sack of 200 lbs. \$4.00; per ton, \$35.00.

Pure Bone Meal. Ground expressly for our trade. Better than Ground Bone for mixing with potting soil, as it is much finer and in better condition for giving immediate effect. 5 lbs. 25 cts.; 25 lbs. \$1.00; 100 lbs. \$2.25; 200 lb. sack \$4.00; per ton \$35.00.

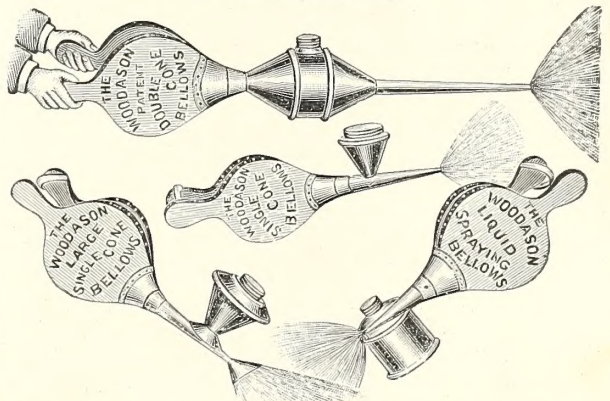

Bone Flour. Ground perfectly fine; an excellent fertilizer for pot plants or beds where an immediate effect is wanted. 5 lbs. 25 cts.; 25 lbs. \$1.25; 100 lbs. \$3.00; bag or bbl. of 200 lbs. \$5.00; per ton \$40.00.

Pulverized Sheep Manure. Excellent for mixing with potting soil. As a lawn top-dressing it is unequalled. 5 lb. package 25 cts.; 10 lbs. 50 cts.; 50 lbs. \$2.00; 100 lbs. \$3.50.

Canada Unleached Hardwood Ashes.

Indispensable as a lawn dressing or to apply to orchards. They should be applied late in fall or early in spring, so that the rains and snows may leach the ashes and carry the elements down to the roots of grass or trees. Our ashes are screened and are in proper condition for immediate use. Apply at the rate of 1000 to 1500 lbs. per acre; 50 lbs. \$1.00; per bbl., about 250 lbs., \$3.00; ton \$20.00.

IMPLEMENTS FOR APPLYING INSECTICIDES.

Single Cone Woodason Powder Bellows.

\$1.00 and \$2.00.

Double Cone Woodason Powder Bellows.

\$3.00.

Spraying Bellows. \$2.00.

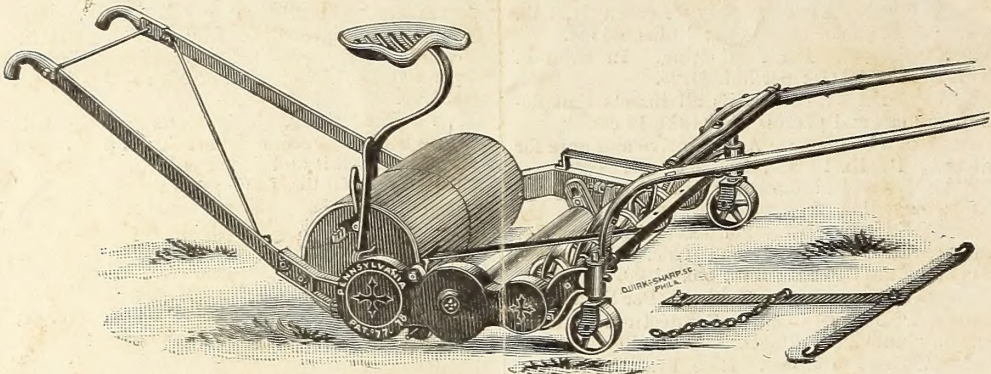

Lewis' Spraying Outfit.

Will thoroughly spray a ten acre orchard in one day—Spraying Pump, Agricultural Syringe and Veterinary Syringe combined. Made of polished brass. Just what is needed by every Farmer, Fruit Grower, Gardener, Nurseryman, Florist, Stockman, etc.

Complete outfit \$5.00.
